Friday, November 11 - FWAC 2016

Session 1 - Chair: Heejin Park

14:00 - 15:00	**Invited Talk 1: Shortest paths in weighted subdivisions** Antoine Vigneron
15:00 - 15:20	**The farthest-point geodesic Voronoi diagram of points on the boundary of a simple polygon** Eunjin Oh
15:20 - 15:40	**Obstructing Visibilities with One Obstacle** Jiwon Park
15:40 - 16:00	Coffee Break

Session 2 - Chair: Sang Won Bae

16:00 - 17:00	**Invited Talk 2: LP-based algorithms for capacitated facility location** Hyung-Chan An
17:00 - 17:20	**Invitation to Fixed-Parameter Algorithms** Jisu Jeong
17:20 - 17:40	**Bundling Two Simple Polygons to Minimize Their Convex Hull** Jongmin Choi
17:40 - 18:00	**The Number of Holes in the Union of Translates of a Convex Set in Three Dimensions** Otfried Cheong
18:30 - 20:00	Dinner

Saturday, November 12 - FWAC 2016

Session 3 - Chair: Yo-Sub Han

09:00 - 10:00	**Invited Talk 3: Theoretical Computer Science for Numerics** Martin Ziegler
10:00 - 10:20	**Implementation and Empirical Evaluation of two Algorithms for Computing Characteristic Polynomials' Coefficients in Exact Real Arithmetic** Sewon Park
10:20 - 10:40	**Implementation of Robot Journalism Framework based on Combinatory Categorical Grammar** Seungwoo Shin
10:40 - 11:00	Coffee Break

Session 4 - Chair: Hee-Kap Ahn

11:00 - 12:00	**Invited Talk 4: Visual object recognition and learning with minimal supervision** Minsu Cho
12:00 - 12:20	**Pseudoknot-Generating Operation** Da-Jung Cho
12:20 - 12:40	**Nondeterministic seedless oritatami systems and hardness of testing their equivalence** Hwee Kim
